

The company

queueup creates, develops and manages unique Smart Activation Formats and Smart Loyalty Programs for leading retailers and service providers in Europe and beyond. queueup's Smart Formats are more effective thanks to the combined power of unique and refreshing creative concepts, cutting-edge technology and the use of social and sustainable values to maximize each format's impact.

Team

The queueup team consists of a young and ambitious group of people with a can-do mentality. At our office you find the directors, the management team and all other departments such as operations, sales and IT. The atmosphere at our office is informal, dynamic and energetic!

We will provide

A role where you will experience data analysis in a fast-moving, international environment. Your data analysis will often be the basis for real business decisions. We will give you a lot of responsibility and the opportunity to start your own projects. You will really feel like a full member of the queueup team from the start of your internship.

Your responsibilities will be

- Analysing results and consequently coming up with new ideas to increase sales
- Forecasting sales results
- Interpreting data analyses and translate your findings to "business language"
- Using and optimizing our Yield Management Platform
- Optimizing Social and Display Retargeting

We require

- At least a Bachelor's degree
- Good knowledge of Microsoft Office, especially Excel
- Comfortable to work with large data sets
- Passion for data-mining, familiarity with Google Analytics, SQL, Python or R is a big plus
- Availability of at least 4 months (40 hours per week)
- Proficiency in English and preferably one or more other language(s)
